

Trade Waste Compliance Tips

TRADE WASTE COMPLIANCE Best Practice Tips

- Do not pour oil/ milk products down the drain/ sink
- Scrape and wipe crockery, utensils and dishes prior to washing
- Dry, sweep and clean floors prior to washing with water
- Prepare benches prior to washing with water
- Keep cleaning chemicals in a designated area and handle with care to avoid spills
- Consider using approved quick break detergents which aid the separation of grease and oils from water
- Pump out and service trade waste pre-treatment devices (eg. grease arrestors) in accordance with approval conditions and manufacturers specifications
- Always refill grease arrestors with fresh water immediately after pump out
- Attend pump out insuring proper cleaning of grease trap
