

GLADSTONE
REGIONAL COUNCIL

**Gladstone Regional Council
Adopted Infrastructure
Charges Resolution (No. 1) -
2014**

**Former Calliope Shire,
Gladstone City and Miriam
Vale Shire Local Government
areas**

This is to certify that this is a true and correct copy of the Adopted Infrastructure Charge Resolution (pages 1-44 + maps) for the former Calliope Shire, Gladstone City and Miriam Vale local government areas adopted on 18 November 2014 and took effect on 19 November 2014.

Signed:

Chief Executive Officer

19/11/2014

Part 1 - Introduction

1.1 Sustainable Planning Act 2009

- (i) The resolution is made pursuant to Section 630 of the *Sustainable Planning Act 2009*.
- (ii) The resolution is to be read in conjunction with the State Planning Regulatory Provision (Adopted Charges) - July 2012.
- (iii) The resolution is attached to the Calliope Shire Planning Scheme 2007, The Gladstone Plan 2006 and the Planning Scheme for Miriam Vale Shire 2009, but does not form part of any of the Planning Schemes.

1.2 Effect

The resolution has effect on and from Wednesday 19th November 2014 and applies to the following:

- (i) Development application decisions made on or after this date.
- (ii) Development approvals issued on or after the 5th July 2011 in the former Gladstone City and Calliope Shire local government areas and on or after the 19th July 2011 in the former Miriam Vale Shire local government area that have not yet paid the applicable Infrastructure Charges and are not subject to:
 - (a) an Infrastructure Agreement; and/or
 - (b) current legal proceedings (including conciliations) in relation to Adopted Infrastructure Charges before the Planning and Environment Court at or prior to Wednesday 19th November 2014.

1.3 Purpose of the Resolution

The purpose of the resolution is to establish an *adopted infrastructure charge* for the following trunk infrastructure networks:

- (i) transport network;
- (ii) parks network;
- (iii) stormwater network;
- (iv) water network;
- (v) sewer network

1.4 Interpretation

Calculated Parks Percentage (C_{pp}) is the true parks adopted infrastructure charge divided by the total uncapped charge

dwelling unit has the same meaning as that defined in the Calliope Shire Planning Scheme 2007.

GFA is as per the definition in the Queensland Planning Provisions.

impervious area means an area within a site which does not allow natural infiltration of rainfall to the underlying soil and the majority of rainfall would become runoff e.g. roadways, car parks, footpaths, roofs, hardstand areas (natural and sealed), compacted etc.

local government means Gladstone Regional Council

local government area means the former Local Government areas

maximum adopted charge means the charge limit set out in the maximum charging framework established in the *Sustainable Planning Act 2009* and *SPRP*.

planning scheme uses (as detailed in Column 1, Table 1, Appendix 1) have the same definition as per the associated Planning Schemes.

residential zone means the planning scheme zones as stated in Section 1.5.

SPRP means the State Planning Regulatory Provision (adopted charges) 2012.

1.5 Residential Zone

For the purposes of calculating an adopted infrastructure charge for reconfiguring a lot, the residential zones applicable are:

- For the former Calliope Shire Local Government Area are "Village", "Residential", "Urban Expansion" and "Rural Residential".
- For the former Gladstone City Local Government Area are "Residential", "Residential (Higher Density)", "Park Residential" and "Urban Expansion".
- For the former Miriam Vale Shire Local Government Area are "Low Density Residential", "Rural Character", "Medium Density Residential and "Special Residential".

Part 2 - Application of the Resolution

2.1 Application to the local government area

- (i) The adopted infrastructure charges contained within this resolution apply to development on land within the former Local Government areas except as detailed in (ii) below.
- (ii) The adopted infrastructure charges do not apply to the following areas:
 - Work or use of land authorised under the *Mineral Resources Act 1989*, the *Petroleum Act 1923*, the *Petroleum and Gas (Production and Safety) Act 2004* or the *Greenhouse Gas Storage Act 2009*; or
 - Development in a priority development area under the *Economic Development Act 2012*; or

-
- If a public sector entity that is a department or part of a department proposes or starts development under a designation, the entity is not required to pay any adopted charge for the development.
 - Development in a declared *master planned area* within the former Local Government areas, except where an *adopted infrastructure charges resolution* states otherwise.
- (iii) The adopted infrastructure charges do not apply to Not-for-Profit Organisations (excluding those that have a gaming licence) that develop on Council owned or controlled land.
- (iv) The adopted infrastructure charges do not apply for an Educational Establishment for the Flying Start for Queensland Children program.

2.2 Application to particular development

- (i) This resolution adopts a charge for particular development that is equal to or less than the *maximum adopted charge* and adopts different charges for particular development in different parts of the *local government area*.
- (ii) To enable the *adopted infrastructure charges schedule* identified in the SPRP to be applied to existing development use types, **Appendix 1** identifies the relationship between existing planning scheme use types and the classes of development to which the *adopted infrastructure charges schedule* apply.

2.3 Application to trunk infrastructure networks

The adopted infrastructure charge partially funds the establishment cost of the identified trunk infrastructure networks.

2.4 Priority Infrastructure Area

The priority infrastructure area (PIA) are the areas identified on Map 1 - Calliope Priority Infrastructure Area, Map 1 - Gladstone Priority Infrastructure Area and Map 1 - Miriam Vale Priority Infrastructure Areas, which can be found in Part 8 - Schedule of Maps. A priority infrastructure area identifies the areas within the *local government area* that is intended to accommodate urban growth.

2.5 Charge Areas

The charge areas for the calculation of an adopted infrastructure charge are identified on the following maps, which can be found in Part 8 - Schedule of Maps.

Former Calliope Local Government Area - Maps 2, 3 & 4

Former Gladstone Local Government Area - Map 2

Former Miriam Vale Local Government Area - Maps 2, 3 & 4

Part 3 - Trunk Infrastructure Networks

3.1 Trunk Infrastructure Identification and Establishment Cost

Until a Local Government Infrastructure Plan is adopted, this resolution identifies trunk infrastructure for the *local government area* and the establishment cost of the identified trunk infrastructure. Details regarding the trunk infrastructure can be found in Part 9 - Schedule of Plans for Trunk Infrastructure and Part 10 - Schedule of Works for Trunk Infrastructure.

Note: For clarification, trunk infrastructure does not include local parks, open space or reserves or similar land types.

Part 4 - Adopted Infrastructure Charge

4.1 Purpose

This section states the application of the adopted infrastructure charge to be levied by Gladstone Regional Council under section 635 of the *Sustainable Planning Act 2009* for the transport, parks, stormwater, water and sewer networks.

4.2 Adopted Charge

The adopted charge for:

- (i) reconfiguring a lot, is stated in Appendix 2, Adopted charge for reconfiguring a lot; and
- (ii) a material change of use or building work for:
 - (a) residential development is stated in Appendix 3, Adopted charge for residential development
 - (b) non-residential development other than a specialised use as stated in Appendix 1, is stated in Appendix 4, Adopted charge for non-residential development
- (iii) specialised uses or other development not otherwise identified in Table 1 are to be determined by resolution of the *local government* utilising the charging categories in Table 4.
- (iv) The adopted charge will be calculated on the approved use and at the time the decision is made, and will be recalculated at the time of payment.

4.3 Indexation

Under section 629 of the *Sustainable Planning Act 2009*, the Minister may, by gazette notice, change the amount of the *maximum adopted charge*. The change must be no more than the *maximum adopted charge* at the start of the financial year multiplied by the three year moving average annual percentage increase in the PPI index for the period of three years ending at the start of the financial year.

The change to the *maximum adopted charge* will be published in the Government Gazette and take effect the day the notice is gazetted.

Part 5 - Administration of adopted infrastructure charge

5.1 Purpose

States how an adopted infrastructure charge levied by the *local government* is to be administered.

5.2 Calculation

An adopted infrastructure charge that may be levied by the *local government* is calculated as follows:-

$$\text{TAIC} = [(\text{AIC} \times \text{U}) - (\text{C})] \times \text{I}$$

TAIC is the total adopted infrastructure charge that may be levied by the *local government*

AIC is the adopted infrastructure charge as identified in tables 2, 3 & 4 in Appendix 2, 3 & 4.

U is the unit of calculation as identified in tables 2, 3 & 4 in Appendix 2, 3 & 4.

C is the agreed credit as set out in Part 6.

I is the indexation rate as advertised in the Government Gazette (s4.3).

5.3 Development subject to adopted infrastructure charge

- (i) The *local government* may levy an adopted infrastructure charge on the following development:
 - (a) reconfiguring a lot
 - (b) a material change of use of premises
 - (c) carrying out building works
- (ii) If a development is subject to more than one use, the *local government* will levy an adopted infrastructure charge on each approved use type.
- (iii) For an existing lawful use to which a development application is seeking to expand the gross floor area of the facility, the *adopted infrastructure charge* is only to be applied on the part of the development which is subject of the intensification or extension.

5.4 Method of notification of an adopted infrastructure charge

- (i) The *local government* is required to issue an adopted infrastructure charges notice in accordance with Section 637 of the *Sustainable Planning Act 2009*.
- (ii) The adopted infrastructure charges notice may be given only in relation to a development approval or compliance permit.

5.5 Time of payment of an adopted infrastructure charge

An adopted infrastructure charge is payable at the following time:

- (i) if the charge applies to reconfiguring a lot that is assessable development or development requiring compliance assessment - before the *local government* approves the plan of subdivision for the reconfiguration; or
- (ii) if the charge applies to building work that is assessable development or development requiring compliance assessment - before the certificate of classification or final inspection certificate for the building work is issued; or
- (iii) if the charge applies to a material change of use - when the change happens; or
- (iv) otherwise - on the day stated in the adopted infrastructure charges notice; or
- (v) As agreed in an Infrastructure Agreement in 5.6 below.

5.6 Alternatives to paying an adopted infrastructure charge

- (i) The *local government* may enter into a written agreement about:
 - (a) whether the charge may be paid at a different time from that stated in the adopted infrastructure charge notice or negotiated adopted infrastructure charges notice;
 - (b) whether the charge may be paid by instalments;
 - (c) whether infrastructure may be supplied instead of paying all or part of the charge.
- (ii) The *local government* may, for development infrastructure that is land, give a notice in addition to, or instead of an adopted infrastructure charges notice requiring:
 - (a) part of the land the subject of the development application or compliance assessment, to be given to the *local government* in fee simple; or
 - (b) part of the land the subject of the development application or compliance assessment, to be given to the *local government* in fee simple and part of an adopted infrastructure charge.

5.7 Recording adopted infrastructure charges

Local Government must record all levied adopted infrastructure charges in a publicly available adopted infrastructure charges register.

5.8 Possible Exemptions

- (i) The parks component of the per lot residential charge may be credited for development approvals that meet the following criteria:
 - (a) Had a Preliminary Approval (PA) issued prior to 1 July 2011, and;
 - (b) As part of the PA, had an approved parks 'on-ground' contribution that complied with the Planning Policy in place at the time the PA was issued, and;
 - (c) That the parks 'on-ground' contribution that is currently proposed matches the one approved under the PA or exceeds it. Note: Documentation must be produced showing the previous and current parks contributions, and;
 - (d) Has a residential reconfiguring a lot approval issued after the date the AIC resolution took effect.

Note: Parks Credit (Cp) is calculated as per Section 6.3 Calculation of a Credit.

Part 6 - Credits

6.1 Definition of a Credit

- (i) A credit means the amount to be applied for the purpose of calculating an adopted infrastructure charge which takes into account existing land usage of the premises/site.
- (ii) The maximum value of a credit for each site will not exceed the adopted infrastructure charge for the approved land use of the existing site.

6.2 Application of a credit

- (i) A credit will be applied for:
 - (a) an existing approved lawful use already taking place on the premises;
 - (b) a previous use that is no longer taking place on the premises if the use was lawful at the time it was carried out;

-
- (c) other development on the premises if the development may be lawfully carried out without the need for a further development permit and the charges have been paid.
 - (ii) Credits will be calculated based on the same methodology that the adopted infrastructure charges are calculated.
 - (iii) For mixed use developments, the total credit will be calculated on each use that meets (i) (a)-(c) above and added together.
 - (iv) If a credit is higher than the Adopted Infrastructure Charge of the proposed/approved use, a refund will not occur.

6.3 Calculation of a Credit

- (i) Parks Credit (Cp) = AIC (Residential lot) x Calculated Parks Percentage (C_{pp})
- (ii) Agreed Credit (C) = AIC (Existing Use) + Cp (if applicable based on Section 5.8)

Part 7 - Offsets

7.1 Purpose

This section states the *local government's* policy for an infrastructure offset for a trunk infrastructure contribution (refer section 3.1).

7.2 Application of section

This section applies where for a development, the *local government* has for a trunk infrastructure network:

- (i) required the following (*trunk infrastructure contribution*):
 - (a) the supply of work for trunk infrastructure in a condition of a development approval under section 649 (Conditions local governments may impose for necessary trunk infrastructure) of the *Sustainable Planning Act 2009*;
 - (b) the giving of part of the land the subject of a development application or request for compliance assessment in a notice given under section 648K(2) (Agreements about, and alternatives to, paying adopted infrastructure charge) of the *Sustainable Planning Act 2009* (*land dedication notice*); and
- (ii) levied an adopted infrastructure charge in an adopted infrastructure charges notice or a negotiated adopted infrastructure charges notice for the same premises under section 648F (Adopted infrastructure charges notice) of the *Sustainable Planning Act 2009*.

7.3 Claim for an infrastructure offset

- (1) The person bound to provide the trunk infrastructure contribution and the adopted infrastructure charge for the development under the *Sustainable Planning Act 2009* (*claimant*) may give a notice in the prescribed form to the *local government* which states the following:
 - (i) that the claimant proposes to supply the trunk infrastructure contribution;
 - (ii) that the claimant seeks an offset for the supply of the trunk infrastructure contribution against an adopted infrastructure charge (*infrastructure offset*);
 - (iii) the claimant's estimate of the following:
 - (a) the market estimate of the infrastructure required by the development (E_r);
 - (b) the market estimate of the trunk infrastructure specified by the *local government* (E_s);
 - (c) the value of the infrastructure offset for the trunk infrastructure contribution.
- (2) The *local government* is to give a notice in the prescribed form to the claimant which states the following:
 - (i) whether an infrastructure offset is applicable or not;
 - (ii) if an infrastructure offset is not applicable, the reason;
 - (iii) if an infrastructure offset is applicable, the value of the infrastructure offset.

7.4 Calculation of an infrastructure offset

- (1) The value of an infrastructure offset for trunk infrastructure which is:
 - (i) predeveloped land, is the undeveloped valuation of the land; and
 - (ii) work, is $(E_s - E_r)$:
- (2) The market estimate of the infrastructure required by the development is the estimate expressed in dollars of the design and construction of the work required to service the development:
 - (i) including the following:
 - (a) the cost of planning and designing the work;
 - (b) the cost of survey and site investigation for the work;
 - (c) a cost under a construction contract for the work;
 - (d) a portable long service leave payment for a construction contract;

- (e) an insurance premium for the work;
 - (f) a local government inspection fee for the commencement and end of the maintenance period for the work;
 - (g) the cost of an approval for the work;
 - (ii) excluding the following:
 - (a) a cost of carrying out temporary infrastructure;
 - (b) a cost of carrying out non trunk infrastructure;
 - (c) a cost of the decommissioning, removal and rehabilitation of infrastructure identified in paragraphs (a) and (b);
 - (d) a part of the trunk infrastructure contribution provided by the local government or a person other than the person seeking the infrastructure offset;
 - (e) a cost to the extent that GST is payable and an input tax credit can be claimed for the work.
- (3) The market estimate of the trunk infrastructure specified by the *local government* is the estimate expressed in dollars of the design and construction of the trunk works:
- (i) including the following:
 - (a) the cost of planning and designing the work;
 - (b) the cost of survey and site investigation for the work;
 - (c) a cost under a construction contract for the work;
 - (d) a portable long service leave payment for a construction contract;
 - (e) an insurance premium for the work;
 - (f) a local government inspection fee for the commencement and end of the maintenance period for the work;
 - (g) the cost of an approval for the work;
 - (ii) excluding the following:
 - (a) a cost of carrying out temporary infrastructure;
 - (b) a cost of carrying out non trunk infrastructure;
 - (c) a cost of the decommissioning, removal and rehabilitation of infrastructure identified in paragraphs (a) and (b);
 - (d) a part of the trunk infrastructure contribution provided by the local government or a person other than the person seeking the infrastructure offset;
 - (e) a cost to the extent that GST is payable and an input tax credit can be claimed for the work.
- (5) The *local government* is to calculate the amount of the value of the infrastructure offset by indexing the value of the infrastructure offset from the date of the notice given under section 7.3(2) (Claim for an infrastructure offset) to the date that the infrastructure offset is to be

offset against an infrastructure charge in accordance with the indexing as stated in section 4.3.

7.5 Application of an infrastructure offset

The *local government* is to offset the amount of the value of an infrastructure offset against an adopted infrastructure charge for the trunk infrastructure network to which the trunk infrastructure contribution relates if the trunk infrastructure contribution is supplied for the development by the claimant in accordance with the applicable development approval and land dedication notice.

- **Stormwater**

Note: This resolution does not identify stormwater trunk infrastructure and as such, Gladstone Regional Council's Infrastructure Charges do not include a stormwater charge. This is accepted by Council on the basis that all developments are conditioned to provide assets on-site to achieve non-worsening of stormwater quantity, in accordance with Queensland Urban Drainage Manual, and comply with the requirements of the State Planning Policy with respect to Stormwater Quality onsite.
