Granite Creek culvert now reopen to single lane traffic

Temporary Granite Creek culvert remediation works are complete with the culvert now reopen to single lane traffic.

Roadway repairs have returned the culvert to a safe standard for traffic, able to sustain light and heavy vehicles.

The roadway will remain single lane until a more permanent solution is designed and constructed.

Please follow direction of signage.

As local catchments are subject to change at short notice, motorists are reminded to continually assess conditions, particularly after significant rain, and to drive with care.

Residents can contact 4970 0700 if they have any further enquiries.
